There may be some ground for objection to a system of grading which gives the province of Manifola incidental credit for wheat grown in Alberta and Saskatchewan, But not nearly so much an liver would be to a system of which tacked the same of the saskatchewan Rut and the same of the same of

Its couldity of wheat that is grown in Alberta, ever old grow it; or ever can grow it. Alberta wheat is made in the Alberta climate, and nowhere else. To use a name that would suggest the mild climate act of British Columbia as its place of origin acts.
